

FitBuddy

AI Fitness Plan Generator using Gemini Models

A BCA Final Year Project | Powered by Google Gemini AI

ⓘ ⚠ Not a substitute for professional medical advice.

Introduction

FitBuddy is an intelligent fitness assistant that generates **personalised workout and nutrition plans** using the power of Google Gemini AI — tailored to each user's unique goals, lifestyle, and fitness level.

AI-Powered

Gemini LLM at the core

Personalised

Plans based on user inputs

Instant

Real-time plan generation

Problem Statement

The Challenge

- 1 Generic Plans Don't Work**

One-size-fits-all fitness routines ignore age, health, and goals.
- 2 Personal Trainers Are Costly**

Professional guidance is inaccessible for most students and beginners.
- 3 Information Overload**

Too much conflicting advice online leads to confusion and inaction.

Objectives

1

Personalised AI Plans

Generate custom workout & diet plans based on user profile

2

Safety First

Include appropriate disclaimers and health-safe guidance

3

Easy Accessibility

Simple, intuitive interface for all fitness levels

4

Leverage Gemini AI

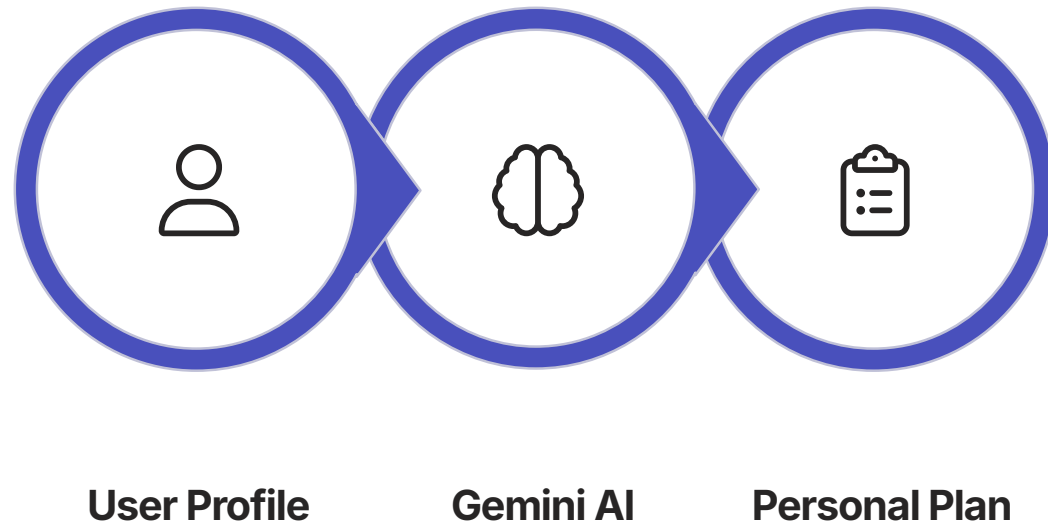

Demonstrate real-world use of Google's Gemini LLM in a student project

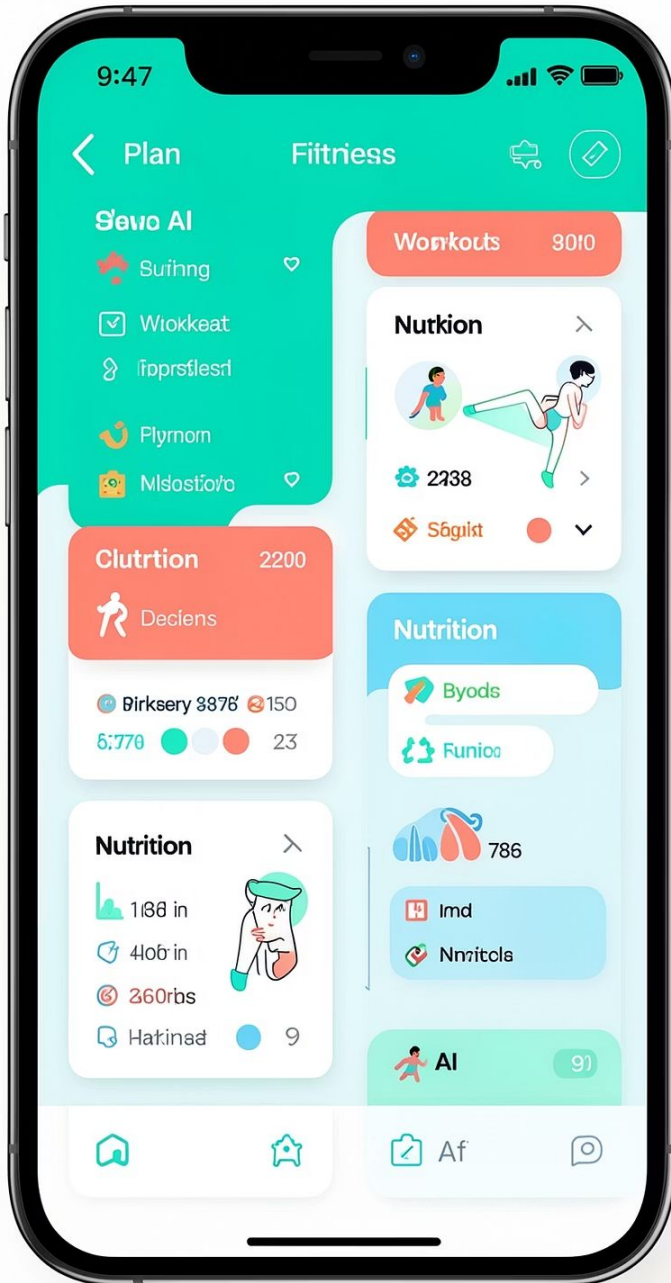

Proposed Solution

How FitBuddy Works

Users fill in a simple profile — age, weight, fitness goal, activity level, and any health concerns. Gemini AI processes this and returns a **structured, safe, and actionable fitness plan** instantly.

- ❏ All plans include a reminder that FitBuddy is **not a replacement for a certified fitness professional or doctor.**

Key Features

Smart Profiling

Collects age, weight, goals & health conditions

Gemini-Powered Plans

Workout & diet plans generated by Gemini LLM

Safety Guidance

Built-in disclaimers & health safety notes

Plan Regeneration

Adjust inputs and instantly refresh your plan

System Architecture & Working Flow

Frontend collects user data → validated inputs sent to Gemini API → structured response parsed and displayed as a clean, readable fitness plan.

Technologies Used

Tech Stack

Google Gemini API

Core AI engine — gemini-1.5-flash / gemini-pro models

Frontend

HTML, CSS, JavaScript / React.js

Backend

Python (Flask) for API integration

Deployment

Google Cloud / Vercel for hosting

Benefits & Future Enhancements

Current Benefits

→ Free & Accessible

No trainer fees — available 24/7

→ Truly Personalised

Plans adapt to every user's unique profile

→ Instant Results

Full plan generated in seconds

Future Roadmap

→ Progress Tracking

Log workouts and monitor improvements

→ Wearable Integration

Sync with smartwatches & fitness bands

→ Multilingual Support

Plans in Hindi, Tamil, and regional languages

Conclusion

Your Fitness Journey, Powered by AI.

FitBuddy bridges the gap between **cutting-edge AI** and everyday wellness — making personalised fitness guidance accessible to everyone.

Gemini AI

Smart, context-aware plans

Personalised

Built for every individual

Responsible

Not a medical substitute
